

Another innovative product from the leader in production counting solutions

# PROLINE

## PL-2004 Batch Counter

### OVERVIEW

The new ProLine PL-2004 Batch Counter is the perfect solution for multi-batch counting and tracking total pieces. With the ability to add two inputs, you can do multiple batch counts and track total pieces. Two available outputs each have a N.O. output to allow you to inhibit up-stream/downstream devices or activate tower lamps, alarms, or provide an input to a host controller. The outputs can be configured to latch on until reset or momentarily latch for a set time. The PL-2004 comes with one input sensor w/ 3m cable and one 3m 2-wire output cable (flying leads). An additional sensor and I/O cable can be added optionally.

### FEATURES

Compact, 3.5" touch screen

Easy to use, auto and manual reset

Add to any production line

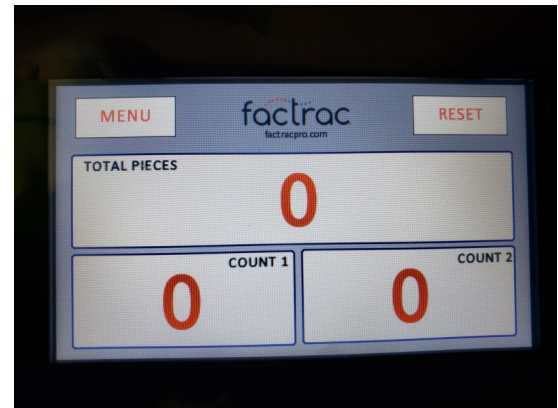

Up to Two sensor inputs and two outputs

Dry contact outputs to pause up and down stream devices or signal tower lamps, buzzers, and more

### INCLUDES
