

Another innovative product from the leader in production counting solutions

# PROLINE

BC-Counter

## OVERVIEW

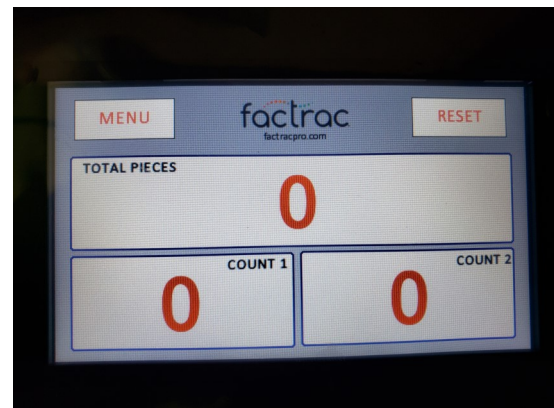

The new ProLine BC Counter is the perfect solution for multi-batch counting and tracking total pieces. With the ability to add two inputs, you can do multiple batch counts and track total pieces. Two standard outputs each have a N.O. and N.C. output to allow you to inhibit upstream/downstream devices or activate tower lamps, alarms, or provide an input to a host controller. The outputs can be configured to latch on until reset or momentarily latch for a set time. The BC Counter comes with one input sensor w/ 3m cable and one 3m 4-wire output cable (flying leads). An additional sensor and/or I/O cable can be added optionally.

## FEATURES

- Compact, 4.5" touch screen
- Easy to use, auto and manual reset
- Add to any production line
- Two sensor inputs and two outputs
- Dry contact outputs to pause up and down stream devices or signal tower lamps, buzzers, and more

## INCLUDES

- One output cable
- One Diffuse Sensor input w/ 3m cable

## OPTIONS

- Additional Input sensors; (diffuse, reflective, and more)
- Universal, adjustable sensor mounting with clamp and magnet
- Patch cable extensions
- Additional Output cable
