

Display your ERP,MRP,WMS collected machine data remotely

Reduce manual and spreadsheet processes by up to 70% with **PORTAL™**

Choose from 7 preloaded display templates, all included

Already collecting machine data with your ERP, MRP, or WMS system? Now, with **PORTAL™** you can display that data on TVs and Monitors throughout your facility. Machine operators and other employee personnel can easily see how each machine is performing .

PORTAL™ is equipped with seven display templates that allow you to display anywhere from 3 up to 18 different metrics from your ERP,MRP,WMS system for easy viewing at any location in your facility.

What do you want to display? Actual Count? Job name/number? Machine cycles for maintenance? O.E.E.?

PORTAL™ allows values, font size, font color, and background colors to be modified from the ERP/MRP/WMS system with simple JSON Post requests. Display time based metrics, percentage based metrics, ascending/descending numerical values, and much more.
